Academic Update – Yuvanika S

Dear Parents,

🌷Greetings from SIMATS Engineering🌷

We are glad to share that Yuvanika has successfully completed her internship viva on Friday, 20.03.2026. She presented her project outcomes with clarity and confidence, demonstrating a strong understanding of the technical concepts, methodologies, and tasks she handled during her internship. Her performance reflects the consistent effort, responsibility, and commitment she maintained throughout her training period. We appreciate her hard work and encourage her to carry forward the same level of dedication in her academic and professional pursuits.

Hackathon Participation:Engaging in hackathons will provide Yuvanika with meaningful exposure to real-time challenges, collaborative problem-solving, and innovative thinking. These platforms are excellent opportunities for students to sharpen their technical skills, build confidence, and experience teamwork under time-bound conditions. We encourage her to actively participate in upcoming hackathons, as they will greatly enhance her technical profile and support her placement preparation.

Placement Preparation:Yuvanika has begun strengthening her placement readiness by focusing on aptitude development, refining her technical competencies, and improving her communication skills. Consistent practice, involvement in technical events, and regular participation in coding and problem-solving activities will help her become more confident and well-prepared for recruitment processes. We request your continued support in motivating her to stay committed and maintain steady progress in her preparation.

Thank you for your time and cooperation. Wishing you and your family a wonderful and productive week ahead.
